PROFESSIONAL SUMMARY

Full Stack Developer and Product Lead with 5+ years of experience architecting and delivering scalable web, mobile, and AI-powered applications for clients across Pakistan, Saudi Arabia, and international markets. Currently serving as Product Lead at Visiontillion (vstore.sa, Riyadh) joined as a 3D Developer, promoted to full-time within 1 month, and elevated to Product Lead within 1.5 months managing backend, frontend, AWS DevOps, and AI development end-to-end solo. Founder and CEO of Plivix Technologies, a boutique software studio delivering full-stack development, AI automation, ML, data science, and 3D development services. Manager and Full Stack Developer at Switch2itech with 30+ deployed systems and VPS infrastructure managed independently. Delivered 60+ client projects across web, mobile, and AI domains. Equally effective as a hands-on individual contributor and as a technical lead who owns products from architecture to deployment.

CORE COMPETENCIES

Frontend Development: React.js, Next.js (SSR, SSG, ISR), TypeScript, JavaScript (ES2022+), Three.js, Tailwind CSS, Redux Toolkit, Zustand, React Query, Framer Motion, HTML5, CSS3, Responsive Design

Backend Development: Node.js, Express.js, RESTful API Design, GraphQL, Microservices Architecture, WebSockets, Socket.io, PHP, SQL, AI Integration, Prompt Engineering

Database Management: MongoDB, PostgreSQL, MySQL, Firebase, Redis, Supabase, Query Optimization, Schema Design

Mobile Development: React Native (Expo), iOS and Android Deployment, Cross-Platform Apps

Cloud & DevOps: AWS (EC2, S3, SQS, Lambda), VPS Server Administration, Docker, CI/CD Pipelines, GitHub Actions, Vercel, Dokploy, Linux Server Administration

AI & 3D Development: LLM Integration, AI Agents, n8n Automation, Meshy.ai, Blender (Headless), PixiJS, Phaser, Solidity (Smart Contracts), Web3/NFT Systems

Third-Party Integrations: Stripe, Alchemy (Web3), Twitter OAuth, SIWE Wallet Auth, Twilio, Cloudinary, Google APIs, Groq

Engineering Leadership: Team Leadership, Product Ownership, Architecture Design, Client Communication, Project Management, Agile/Scrum, Sprint Planning

Specializations: SaaS Architecture, Web2.5/Web3 Platforms, 3D Development, AI-Powered Products, Full-Stack Solo Delivery

PROFESSIONAL EXPERIENCE

Product Lead & Full Stack Developer

Dec 2025 – Present

Visiontillion (vstore.sa) – Riyadh, Saudi Arabia (Remote)

Joined as a 3D Developer, promoted to full-time within 1 month, and elevated to Product Lead within 1.5 months based on technical ownership and delivery quality.

- Leading all product development end-to-end — backend, frontend, AWS DevOps, and AI features — as the sole technical owner of the platform
- Architected an AI-powered 3D print pipeline: Meshy.ai generation, AWS S3 storage, SQS job queuing, and local Python worker with Blender headless repair and Trimesh validation
- Drove significant product scope expansion well beyond the initial 3D development role through entrepreneurial initiative and technical ownership
- Check the platform at vstore.sa

Manager & Full Stack Developer

Oct 2025 – Present

Switch2itech – Sargodha, Pakistan (Remote)

- Built and deployed 30+ systems currently in active use by local clients
- Set up and manage 2 VPS servers from scratch, handling all DevOps infrastructure independently including Dokploy and server configuration
- Handling full-stack development and overall technical management of the company

Founder & CEO

Jan 2025 – Present

Plivix Technologies – Pakistan (Remote)

- Founded and lead a boutique software studio offering full-stack development, AI automation, ML, data science, and 3D development to international clients (US, UK, Canada, etc)
- Built and maintaining self-hosted n8n automation infrastructure for B2B lead generation and outreach pipelines
- Delivered 30+ client projects across web, mobile, and AI domains; built complete SEO-optimized presence ranking on Google first page
- Check the studio at plivix-tech.com

Web Development Intern → Full Stack Developer

Feb 2023 – Jan 2024

HiSkyTech – Sargodha, Pakistan

- Started as an intern and progressed to full-stack development responsibilities, building and deploying web applications for local clients
- Gained hands-on experience with MERN stack in production environments and client-facing delivery

Freelancing (Fiverr or Upwork)

2021 – Present

Global Clients – Remote

- Designed and delivered 60+ full-stack projects for clients across Pakistan, Saudi Arabia, and international markets including React/Next.js web apps, Node.js APIs, React Native mobile apps, SaaS platforms, and AI-integrated MVPs
- Served 10+ recurring React Native clients; landed first major project (Rezone — Real Estate App) through mobile development expertise
- Integrated AI into multiple client products including AI agents, LLM-powered workflows, and automated pipelines using Groq, OpenAI, and n8n

KEY PROJECTS

Vstore 3D Print Platform – *Next.js, Node.js, AWS (S3, SQS), Python, Blender, Meshy.ai, Three.js*

AI-powered 3D print marketplace with end-to-end pipeline — AI mesh generation, AWS S3 storage, SQS job queuing, local Python worker with Blender headless repair and two-pass Trimesh validation, weighted printability scoring, and overhang detection. Built solo as Product Lead at Visiontillion.

Live: vstore.sa

Chomperz (Web2.5 Idle Browser Game) – *Next.js, Node.js, MongoDB, Alchemy, PixiJS/Phaser, Socket.io, Solidity*

Full technical architecture for a Web2.5 idle browser game featuring dual-currency Z-Coin economy, NFT multiplier systems, Territory Map with Crown/Frontier Lands, King of the Hill bidding, Crib decorator, Twitter OAuth + SIWE wallet authentication, and anti-cheat architecture. Delivered complete technical specification and Milestone 1 client brief.

Live: chomperz.app

Plivix Technologies — Agency Site – *Next.js, Tailwind CSS, Vercel*

Full company site with SEO optimization achieving Google first-page ranking. Complete frontend with service pages, portfolio, and contact flows.

Live: plivix-tech.com

N4NoCode (AI-Powered Website Builder) — *Next.js, React, PostgreSQL, Prisma, Inngest, tRPC, ES2*

AI-driven no-code platform that generates fully functional websites through natural language prompts. Features a queue-based job pipeline via Inngest for async generation, end-to-end type-safe APIs with tRPC, and a PostgreSQL + Prisma data layer for project persistence and user management.

Live: n4nc.space

SoftDraw (Collaborative Whiteboard) — *Next.js, React, Prisma, Clerk, Liveblocks*

Miro-inspired real-time collaborative whiteboard with multiplayer canvas, live cursor presence, and room-based collaboration powered by Liveblocks. Clerk handles authentication and user management. Full Prisma-backed persistence for boards and workspace data.

Live: softdraw.site

Distribution Management System — Multi-Tenant SaaS, Full Stack

Production-grade multi-tenant distribution and finance management system actively used by multiple shops and clients in Sargodha. Features complete accounting module, purchase and sale management, quotation generation, inventory tracking, and per-tenant reporting dashboards. Built for real-world retail and distribution workflows with live client adoption.
